

# Instructions on how to use YTD (Youtube Downloader)

Compiled and written By Ian Booker  
using a PC and Windows 10.

To the right is the main window of YTD

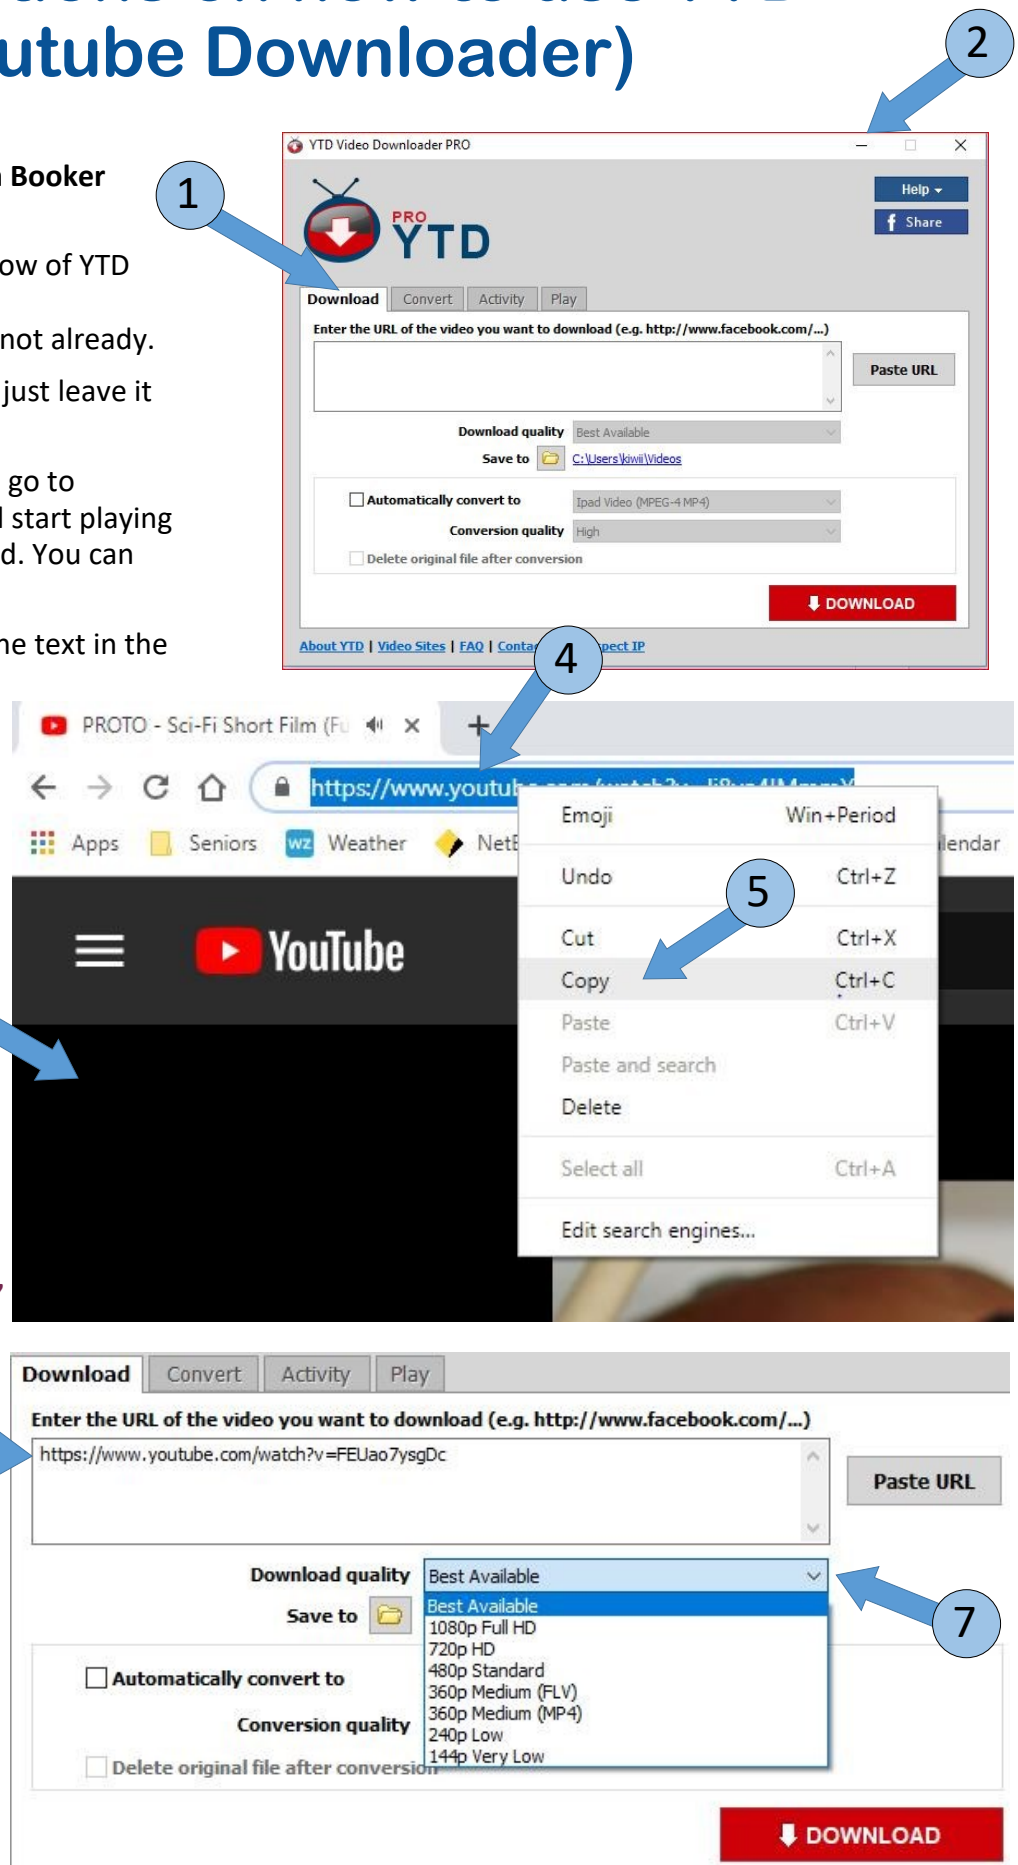

- 1/. Click **"Download Tab"**, if not already.
- 2/. You can Minimize YTD or just leave it there.
- 3/. Open your Web browser, go to **www.youtube.com**, find and start playing the Video you want download. You can now pause it if you wish.
- 4/. Place your pointer over the text in the address bar and **right click**. The text address starting with http will change to blue and a drop down menu will appear.

- 5/. Move your pointer down the menu and left click on **"Copy"**, minimize your browser or move it aside and bring up YTD on-to your desktop.

- 6/. Move your pointer over this area or click **"Paste URL"** and the URL address you copied will appear here.

**Before you hit the "Download" You must complete steps 7 to 20**

- 7/. The following settings you only have to do once. It will save changes you make. Next you have to choose a download quality. Click the little down arrow and select **"Best Available"** from the selection.

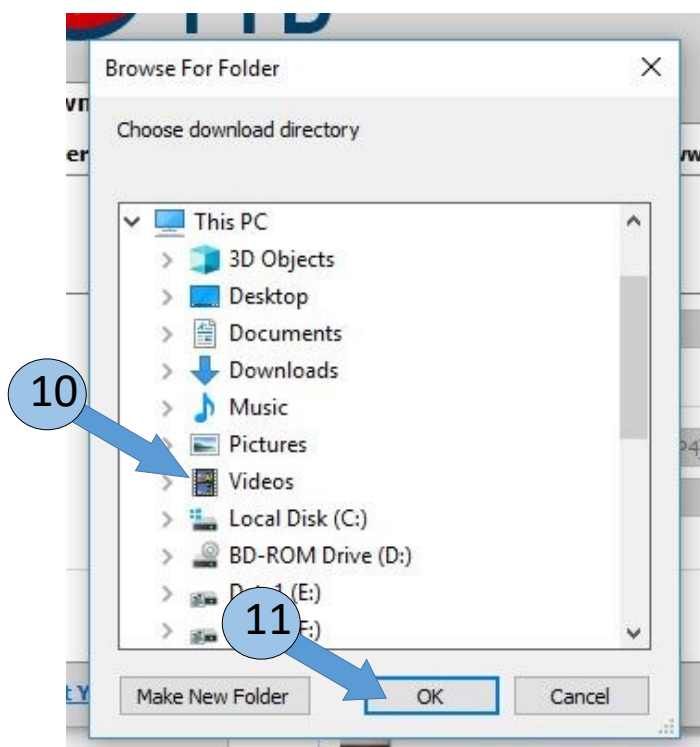

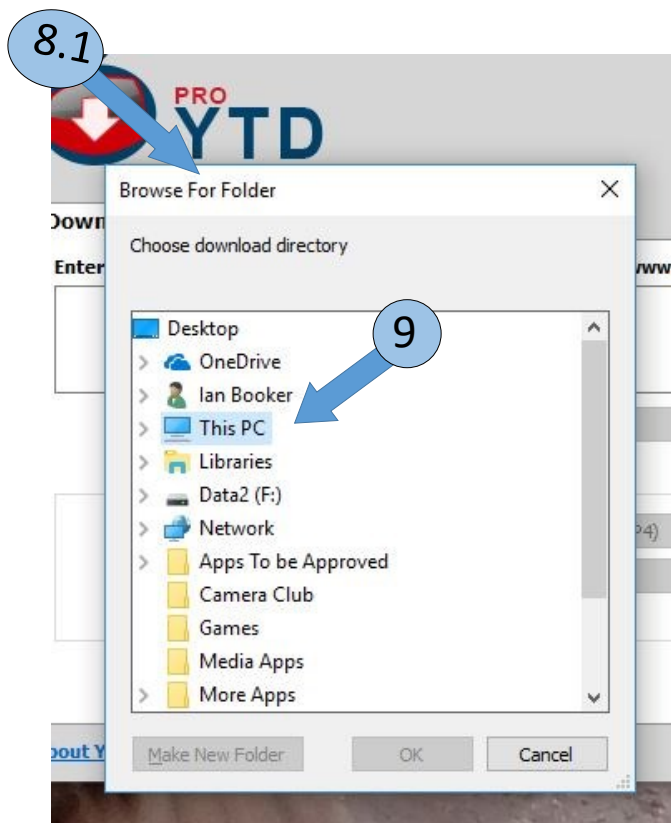

8/. Save to. You need to make sure you can find your videos latter. If the save too path is set to **"C:\users\yourname\videos"** you don't need to change anything, go to instruction 12/. if it is not correct, left click on **"Save to"** and a **"Browse For Folder"** window will open. 8.1/.

9/. Left click on **"This PC"** to show the folders in it.

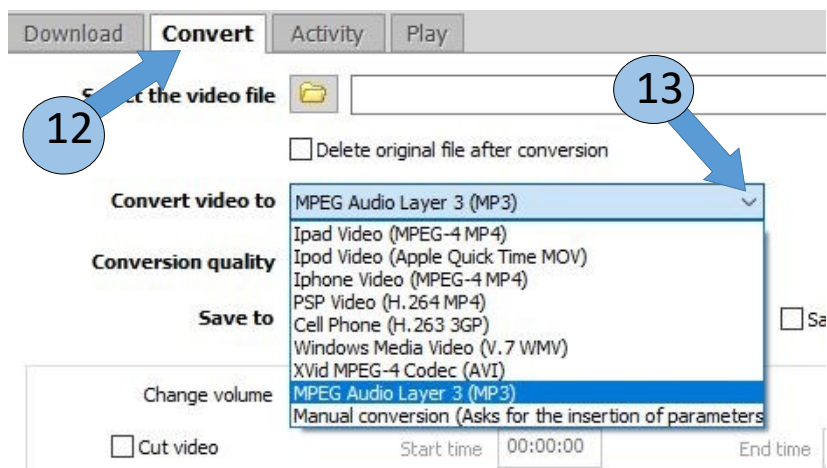

10/. Left click once on **"Videos"** folder.

11/. click **"OK"**

12/. Lets now setup settings for ex-  
tracting the audio from your downloaded  
video. Left click the **"Convert"** tab

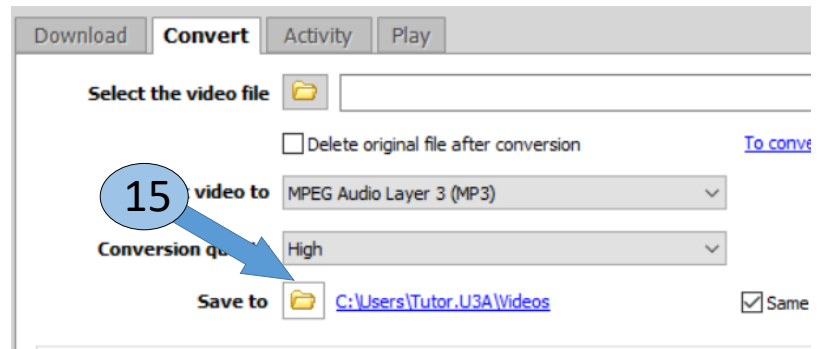

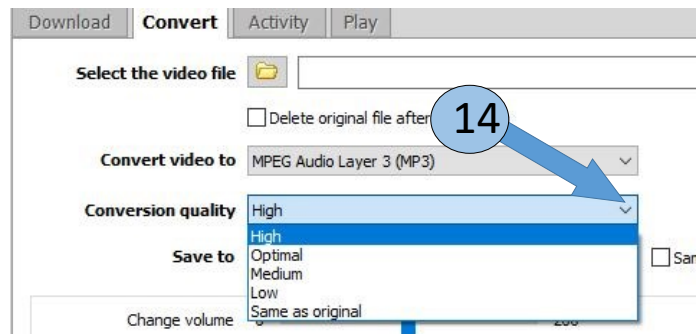

13/. Left click the down symbol and left  
click **"MPEG Audio Layer 3(MP3)"**

14/. On the **"Conversion quality"** left click the down symbol and left click on **"High"**

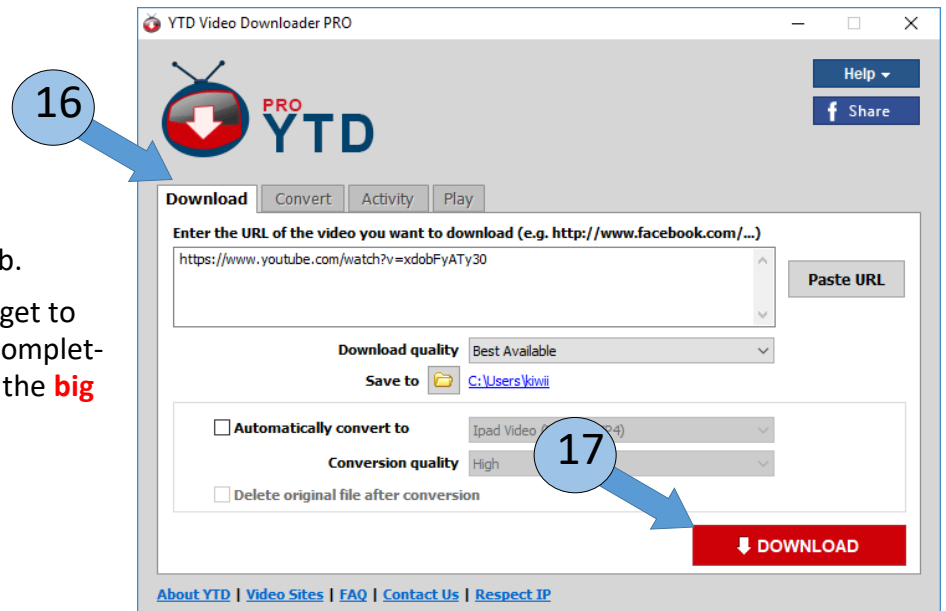

15/. Lastly you need to make sure the **"Save to"** path is correctly saving to your **"Music"** folder.

To do this repeat steps 8 to 11, selecting the Folder **"Music"** instead of Videos.

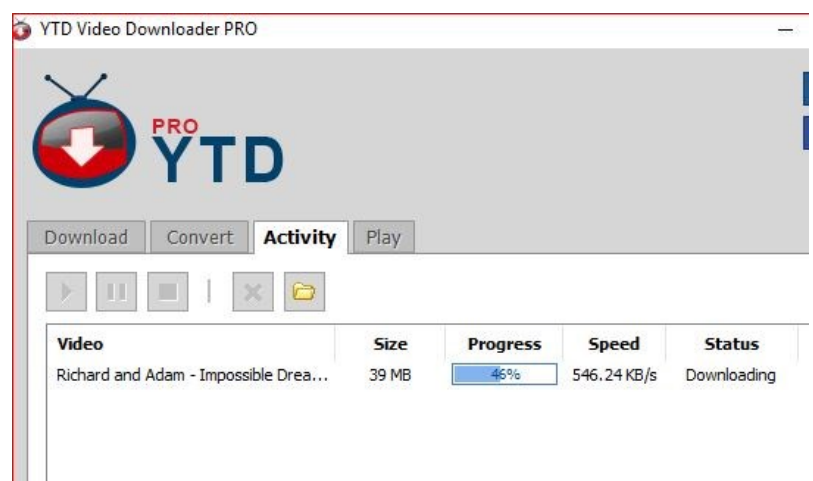

16/. Left click the **"Download"** tab.

17/. Now that's done it's time to get to the fun part. Providing you have completed steps 1 to 6, you can now click the **big red "Download"** button.

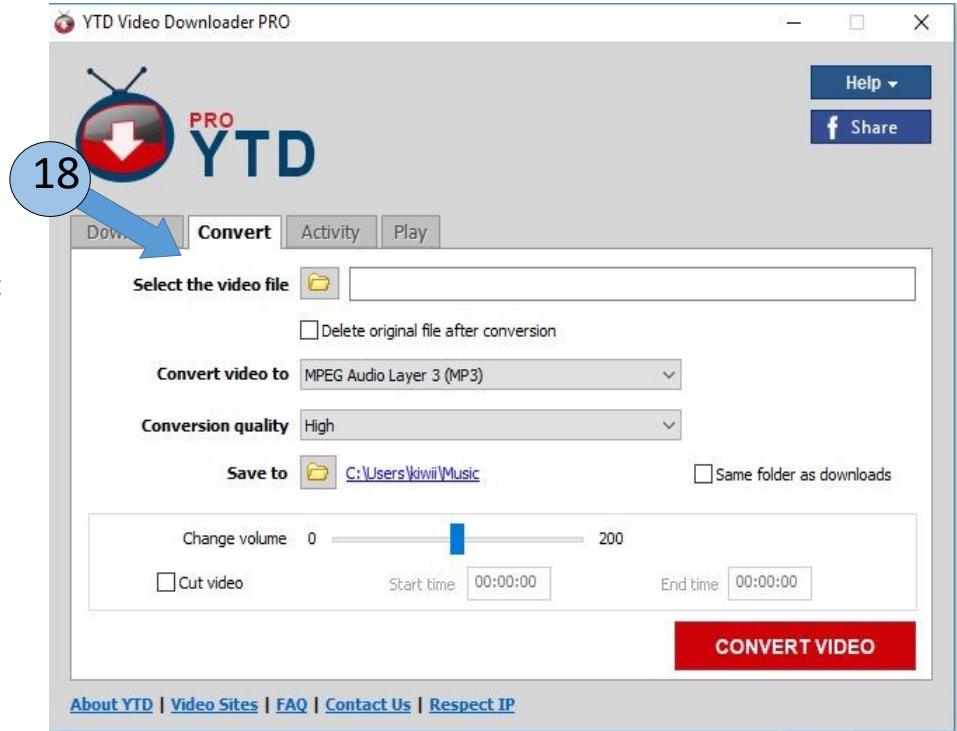

YTD will automatically change to the **Activity** Tab, as shown in image to the right. You will also see the download process along with file size.

Please See next page for Stage 2. Converting video to MP3

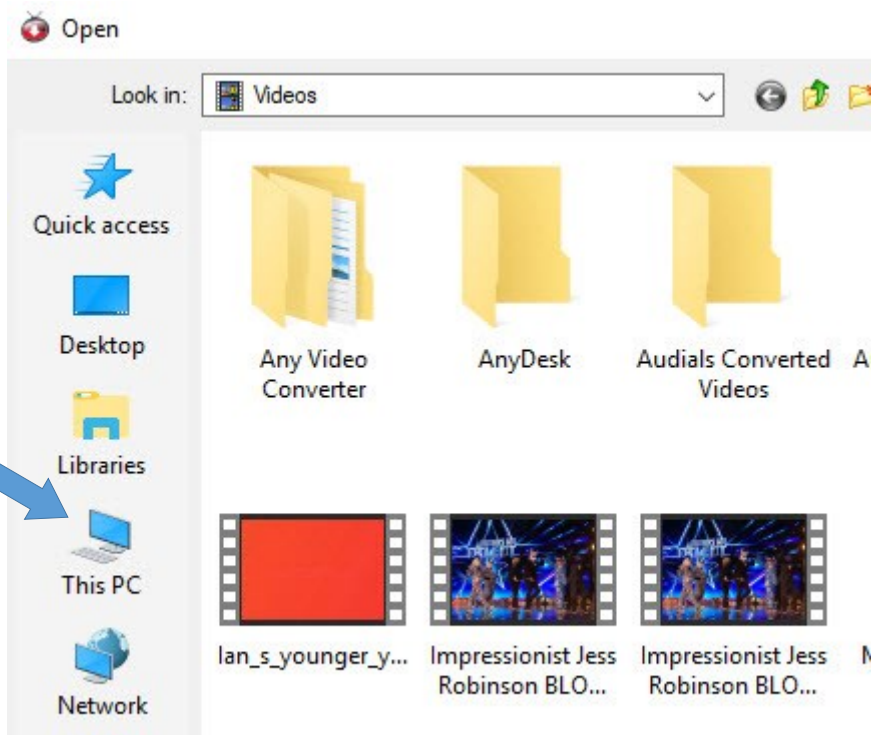

## Stage 2. Converting video to an MP3 file.

**18/.** Left click on the **"Convert"** tab then left click on **"Select the video file"** A file browser window will open and if it shows the contents of your videos, Left click the one you want then left click **"Open"** at the bottom right corner. You are now ready to click the big red **"Convert Video"** button.

**19/.** If it does not show your videos folder and the file you just downloaded then you just need to browse for your Video's Folder. **19/.** Left click **"This PC"**

**20/.** Double left Click on the **"Videos"** Folder and it will open showing your downloaded videos. Left click the one you want then left click **"Open"** at the bottom right corner. You are now ready to click the big red **"Convert Video"** button.

Now that you have the Video and the audio MP3 saved to you PC you can play them any time, any number of times without having to connect to the Internet and using your data allowance.

**Enjoy**
